

## Leading personnel protection for Smurfit Kappa manufacturing plant

When Smurfit Kappa required a protective solution for pedestrian walkways, A-SAFE provided industry-leading pedestrian barriers integrated with swing gates for controlled, safeguarded access.

### Customer:

Smurfit Kappa is a world leading manufacturer of paper-based packaging with over 45,000 employees in 34 countries.

### Situation:

The Irish packaging production company required pedestrian protection at one of their manufacturing sites to safeguard walkways, and provide the safest possible access points to and from the facility for personnel and visitors travelling on foot.

### Solution:

A-SAFE manufactured, supplied and installed iFlex Pedestrian 3 Rail Barrier throughout the manufacturing facility to segregate personnel from dangerous workplace vehicles, clearly creating and defining walkways to organise the facility for maximum productivity.

The installation has given personnel and visitors peace of mind that they are protected when navigating through the newly safeguarded facility.

Manufactured using Memaplex™, Our iFlex barriers are purpose engineered to provide industry leading workplace protection. On impact, iFlex barriers absorb kinetic energy, dissipating it through the barriers to minimise damage to the floor, before flexing back to their original shape.

### Products:

- iFlex™ Pedestrian 3 Rail Barrier
- iFlex™ Swing Gate
